REACH Declaration

Regulation (EC) No 1907/2006 – Article 33 · SRT-Microcéramique products

Scope	Multilayer ceramic capacitors, stacked capacitors, filters and related components manufactured by SRT-Microcéramique
Date of issue	25/11/2026
Revision	A
Candidate List reference	last update 04/02/2026, 253 entries

DECLARATION

SRT-Microcéramique products do not contain any substance of the REACH Candidate List (last update 04/02/2026, 253 entries) in a concentration above 0.1 % w/w, **except products with a tin-lead (SnPb) termination finish**, which contain the following Candidate List substance above 0.1 % w/w:

SUBSTANCE	EC NUMBER	CAS NUMBER	LOCATION	TERMINATION FINISH CODES
Lead	231-100-4	7439-92-1	Termination finish (SnPb)	H, HP, I, IP, N

Safe use: no specific measure required under normal conditions of use (solid metal alloy, no intended release).

ADDITIONAL INFORMATION

- The termination finish is identified by its code in the part number. Lead-free finishes (C, CP, CW, F, G, M, P, Q, S, W, X) contain no Candidate List substance above 0.1 % w/w.
- For SnPb finishes, the lead content of each part number is calculated from the part weight and the termination finish composition; it is not the result of a chemical analysis.
- A lead-free alternative (NiSn finish, termination code X) is available on request.
- A REACH declaration for a specific part number, stating the lead content where applicable, is available on request from commercial@srt-mc.com.
- This declaration reflects the Candidate List in force at its date of issue and will be revised after each Candidate List update.
