Conflict Minerals (3TG) Statement

At SRT-Microcéramique, we are committed to responsible sourcing practices and upholding human rights, environmental sustainability, and ethical business conduct. We recognize the importance of addressing the issue of conflict minerals and strive to ensure that our supply chain remains free from materials that may contribute to armed conflict, human rights abuses, or environmental harm. This Conflict Minerals (3TG) Statement outlines our commitment and expectations regarding the responsible sourcing of Tin, Tungsten, Tantalum, and Gold (3TG) minerals. Among those minerals, our product can contain Tin or Gold that, to the best of our knowledge, not coming from conflict regions.

- Supply Chain Transparency:

We expect our suppliers to provide full transparency regarding the origin of 3TG minerals used in the products or components supplied to SRT-Microcéramique. This includes disclosing information about the smelters, refineries, and mines involved in the supply chain.

- Conflict-Free Sourcing:

Suppliers to SRT-Microcéramique must ensure that the 3TG minerals they provide do not directly or indirectly finance or benefit armed groups engaged in human rights abuses, labour exploitation, or environmental degradation in conflict-affected or high-risk areas. We require our suppliers to source materials only from responsible and conflict-free supply chains.

- Due Diligence and Risk Assessment:

We expect our suppliers to establish and maintain robust due diligence processes to identify and assess any risks associated with the sourcing of 3TG minerals. This may involve conducting reasonable country-of-origin inquiries and working with reputable third-party auditors to ensure compliance with internationally recognized frameworks, such as the Responsible Minerals Initiative (RMI) or the Conflict-Free Sourcing Initiative (CFSI).

- Supplier Verification and Certification:

Suppliers are requested to provide appropriate documentation, such as conflict minerals reporting templates or certifications, to verify the source and chain of custody of the 3TG minerals supplied to SRT-Microcéramique. Compliance with any reporting requirements imposed by applicable laws and regulations is also expected.

- Continuous Improvement:

SRT-Microcéramique encourages suppliers to continuously improve their practices related to conflict minerals sourcing. We recommend engaging with industry initiatives and organizations to stay informed about best practices, share knowledge, and participate in capacity-building programs aimed at promoting responsible sourcing.
